TELEAGENT SYSTEMS INTRODUCES MOBILE TV RECEIVER DELIVERING WORLDWIDE COVERAGE

The TLG1120 is the First Solution to Provide Consumers and Operators with
Access to Global Free-to-Air Content

SUNNYVALE, CA – January 22, 2008 – Telegent Systems, the company that makes television mobile with its high-performance single-chip mobile TV solutions, announced the TLG1120, the industry's first single-chip CMOS mobile TV receiver supporting worldwide TV broadcast standards. The TLG1120 delivers global support for NTSC, PAL, and SECAM TV broadcasts, expanding the market for mobile TV and providing consumers with the same live, familiar content that they view and enjoy in their home.

“With its support for all major broadcast TV standards, the TLG1120 expands the mobile TV market to countries where analog broadcasts are the only standards available for mobile or fixed TV,” said Weijie Yun, president & CEO of Telegent Systems. “Additionally, operators worldwide can use free-to-air mobile TV to recruit and retain subscribers and as a platform for developing incremental revenue streams from premium content, targeted advertising, increased SMS traffic and data exchange.”

The TLG1120 is a high performance, ultra-low power and small footprint solution that is easy to design-in and manufacture. The TLG1120 delivers the highest level of integration including the RF tuner, demodulator, decoder, video processing, scaler, FM stereo radio and universal interface in a 7 x 7 mm QFN package. It provides the highest sensitivity to deliver a positive consumer experience and ultra-low power for extended TV viewing and portable operation. Its SureTrak DSP-based multi-path and Doppler compensation technology provides stable picture quality for speed up to 430 km per hour.

Telegent also provides complete system solutions including antenna design and recommendations, RF design and complete reference design kits. With its small size, low BOM and easy design-in and implementation, the TLG1120 is ideal for mobile handset, portable media player, portable navigation, in-car and portable entertainment and flat panel display applications.

About Telegent Systems, Inc.

Telegent Systems is a leading fabless CMOS semiconductor company providing high performance, single-chip solutions enabling free-to-air and pay-per-view mobile TV in mobile handsets, portable devices and consumer electronics. Telegent's solutions make television mobile, delivering both analog and digital broadcast reception with unparalleled sensitivity and picture quality in mobile environments, ultra-low power consumption and the highest integration simplifying mobile device design and manufacture. Telegent Systems has its US headquarters in Sunnyvale, California and a subsidiary in China. For more information, visit www.telegent.com.
